

The Bridge Mentorship Program helped me build so many important skills. My path to college was so much easier than so many of my friends. Erin

The Bridge Health Partnership looks amazing. Getting a full RN certification in two years after high school opens incredible doors for me. Luke

Man, I was lost in high school. I had no idea what I wanted to do. The Bridge Program changed my life. I graduated from high school and took a job at my internship for \$55,000. I never thought I'd take college courses but Bridge showed me it was possible and prepared me for it. I'm taking business courses now, paid for by my employer, and I'm hoping to open my own company in two years. Brett

Bridge isn't just a pile of resources. They really guide you through your sophomore to senior year. I landed an incredible internship this Summer and am so excited for my senior year. Thomas

I enrolled in the Bridge Program, yes. They helped me build so many skills and meet people. They helped me land two paid internships and get an associates degree while I was in high school. I'm so far ahead of my peers. I'll graduate from college in two years and already have a guaranteed job. Amber
